EDUCATION	<b>Birla Institute of Technology and Science Pilani, Pilani Campus</b> , India Bachelor of Engineering (Honours), Computer Science CGPA: <b>9.98/10</b> — <b>Silver Medalist of 2019 batch</b>	<i>Aug '15 - Jun '19</i>
PROFESSIONAL EXPERIENCE	<b>AI Labs, American Express (Amex)</b> <i>AI Researcher 1</i> Developing new features and maintaining existing features for the AXGBoost algorithm (have contributed to 4 releases till date); exploring new research problems relevant to the business for future products.	<b>Bengaluru, India</b> <i>Jul '19 - Present</i>
WORK PROJECTS	<b>Improvement of XGBoost Distributed Algorithm</b> <ul style="list-style-type: none"><li>Researching on weights used in Weighted Quantile Sketch algorithm by comparing trees built using Single Machine and Distributed XGBoost algorithm.</li><li>Proved empirically and theoretically the scope for optimising weights used by the Distributed XGBoost algorithm.</li></ul> <b>Development of a Universal Search Pipeline</b> <ul style="list-style-type: none"><li>Developed an end-to-end system that enables context-aware search for enterprise-wide unstructured information retrieval using Neo4j, Machine Reading Comprehension algorithm, and Django. (Amongst the 5 projects selected out of 13 as part of an internal ideation workshop).</li><li>Set up internal end-user tests and found that 73% of the queries are answered in the top 10 results.</li></ul> <b>Development of features for AXGBoost</b> <ul style="list-style-type: none"><li>Optimized the distributed algorithm code base from a 2400+ lines code to &lt;500 lines for the new version of AXGBoost (Amex XGBoost) in C++ for better maintainability (has been used in building 10,000+ models internally).</li><li>Provided support for GPU model building for the new version of AXGBoost algorithm.</li></ul>	<i>May '20 - Feb '21</i> <i>Sep '19 - Aug '20</i> <i>Jul '19 - Present</i>
INTERNSHIPS	<b>AI Labs, American Express (Amex)</b> <i>Research Intern</i> <ul style="list-style-type: none"><li>Researched on open-source XGBoost algorithm with a focus on the distributed algorithm (in the Amex context).</li><li>Improved the Approximate Split Point Proposal Algorithm used in distributed AXGBoost, which improved the capture rate on Amex datasets by 4%.</li><li>Inherited functionality from XGBoost to design and implement the architecture for CSV data reading in AXGBoost.</li><li>Improved column distributed data reading of CSV files in AXGBoost so that no column is skipped while reading.</li></ul> <b>Goldman Sachs</b> <i>Summer Analyst</i> <ul style="list-style-type: none"><li>Developed a generic parallel email scanner to enable easy access to conversations that went down for a deal.</li><li>Developed the scanner using Microsoft Exchange Web Services and Java Spring Framework.</li><li>Set up RabbitMQ queues for storing mails at intermediate steps, processed the mails to remove redundant information using text processing techniques, and finally stored them in MongoDB.</li></ul> <b>Gnknowledge Lab, Homi Bhabha Centre for Science Education</b> <i>Summer Intern</i> <ul style="list-style-type: none"><li>Developed a feature-rich offline search engine using Django for a digital learning platform (CLIX) to enable quick content access in schools with poor internet connectivity (deployed in 500 government schools).</li><li>Worked on document ingestion and database initialization using Elasticsearch for diverse types of documents.</li><li>Implemented functions to support suggestions, advanced triplet search, contribution search, and search filters.</li></ul>	<b>Bengaluru, India</b> <i>Jan '19 - Jun '19</i> <b>Bengaluru, India</b> <i>May '18 - Jul '18</i> <b>Mumbai, India</b> <i>May '17 - Jul '17</i>
RESEARCH PROJECTS	<b>Parallelization of K-Medoids Clustering Algorithm</b> <b>Advisor: Prof. Poonam Goyal</b> <ul style="list-style-type: none"><li>Developed parallel K-Medoids algorithm using Adaptive Gridding for spatial partitioning in Spark Java.</li><li>Improved the algorithm's efficiency of selecting initial medoids without compromising the clustering error (average sample size is 10x less than the state of the art - <b>PAMAE</b>) given any skewed data set.</li></ul> <b>Parallelization of Union-find Algorithm</b> <b>Advisor: Prof. Poonam Goyal</b> <ul style="list-style-type: none"><li>Developed a communication efficient distributed Union-find algorithm using Open MPI in C++.</li><li>Reduced the number of message passing operations between processes using deferred bulk updates.</li></ul>	<b>BITS Pilani, India</b> <i>Aug '18 - Dec '18</i> <b>BITS Pilani, India</b> <i>Jan '18 - May '18</i>

COURSE PROJECTS	<b>Kinship Verification from Facial Images of Parents and their Kids</b> <i>Machine Learning</i> — <b>Instructor:</b> <i>Dr. Navneet Goyal</i> <span style="float: right;"><i>Nov '18 - Dec '18</i></span> <ul style="list-style-type: none"> <li>Compared qualitatively and quantitatively the existing techniques (Artificial Neural Networks, SVM, CNN, ensemble of SVMs) for Kinship Verification in R using Keras library.</li> <li>Used the results to design and implement an ensemble of Metric Learning based CNN architecture.</li> <li>Improved accuracy by 2.8% on the KinFaceW-1 dataset and by 3.1% on the KinFaceW-2 dataset.</li> </ul>
	<b>Data Analysis and Modelling of Student Course Grades</b> <i>Machine Learning</i> — <b>Instructor:</b> <i>Dr. Navneet Goyal</i> <span style="float: right;"><i>Sep '18 - Oct '18</i></span> <ul style="list-style-type: none"> <li>Created a Bayesian Belief Network using bnlearn library in R based on grades of students, incorporating various hypotheses as to how attributes in data are related.</li> <li>The network can answer complex queries without being adversely affected by missing values, irrelevant attributes, and size of data.</li> <li>The network can be used to assess teaching pedagogies by modelling natural language queries as conditional probabilities.</li> </ul>
	<b>Foster's Design Methodology on a Range-Queryable Distributed Data Structure (RAQ)</b> <i>Parallel Computing</i> — <b>Instructor:</b> <i>Prof. Shan Sundar Balasubramaniam</i> <span style="float: right;"><i>Apr '18 - May '18</i></span> <ul style="list-style-type: none"> <li>Designed a parallel algorithm to facilitate joining and leaving of peers from a peer to peer network (represented as RAQ data structure) using Foster's Design methodology with a commodity cluster as the target platform.</li> <li>Obtained logarithmic speedup and improved time complexity of joining mechanism compared to sequential execution.</li> </ul>
	<b>Compiler for C-Like Language</b> <i>Compiler Construction</i> — <b>Instructor:</b> <i>Prof. Vandana Agarwal</i> <span style="float: right;"><i>Jan '18 - Apr '18</i></span> <ul style="list-style-type: none"> <li>Developed lexical, syntax, semantic analyzers, and code generator modules of a compiler for a language in C.</li> <li>Implemented functionalities to support simple functions, simple matrix operations, and conditional statements.</li> </ul>
	<b>Design Word Document Index Creation for Shared Memory Systems</b> <i>Parallel Computing</i> — <b>Instructor:</b> <i>Prof. Shan Sundar Balasubramaniam</i> <span style="float: right;"><i>Jan '18 - Feb '18</i></span> <ul style="list-style-type: none"> <li>Designed a PRAM algorithm for document index creation using OpenMP in C++ for a UNIX based file system.</li> <li>Developed a scalable divide and conquer algorithm on a file system with up to 160,000 files.</li> <li>Reduced time taken to create an index from 43 seconds on 1 CPU core to 9 seconds on 32 CPU cores.</li> </ul>
TEACHING ASSISTANTSHIPS	<b>Discrete Structures for Computer Science</b> <span style="float: right;"><i>Aug '18 - Dec '18</i></span> <ul style="list-style-type: none"> <li>Created take home assignments for a class of 150 students.</li> </ul>
	<b>Database Systems</b> <span style="float: right;"><i>Jan '18 - May '18</i></span> <ul style="list-style-type: none"> <li>Created lab sheets and conducted lab sessions for a batch of 40 students.</li> </ul>
	<b>Object-Oriented Programming</b> <span style="float: right;"><i>Jan '17 - May '17</i></span> <ul style="list-style-type: none"> <li>Conducted lab sessions and invigilated final lab exam for a batch of 40 students.</li> </ul>
CERTIFICATIONS	<ul style="list-style-type: none"> <li>Mining Massive Datasets, offered by Stanford Online, eDX <span style="float: right;"><i>May '20</i></span></li> <li>CUDA Programming Masterclass, Udemy <span style="float: right;"><i>Apr '20</i></span></li> <li>Functional Programming Principles in Scala, EPFL, Coursera <span style="float: right;"><i>Nov '18</i></span></li> </ul>
TECHNICAL SKILLS	C, C++, Java, Python, R, Scala, Scheme, MPI, OpenMP, Spark Java, Django
AWARDS AND SCHOLARSHIPS	<ul style="list-style-type: none"> <li><b>Drives Results Award:</b> Awarded in the AI Labs town hall at Amex for my contribution to AXGBoost. <span style="float: right;"><i>Feb '21</i></span></li> <li><b>BITS Merit Scholar:</b> Received 80% Scholarship for being in the top 1% in all semesters. <span style="float: right;"><i>Aug '15 - Jun '19</i></span></li> <li>Awarded <b>Commendation Letter</b> from HRD Minister for being among the top 0.1% in class 12<sup>th</sup> exam. <span style="float: right;"><i>Jun '15</i></span></li> </ul>
EXTRA CURRICULAR ACTIVITIES	<ul style="list-style-type: none"> <li>Volunteered to take English lessons virtually for 40 security guards at Amex. <span style="float: right;"><i>Feb '21</i></span></li> <li>Google AI Summer School HCI+AI for Social Good Track: among the 50 students selected for the school. <span style="float: right;"><i>Aug '20</i></span></li> <li>Member, Organizing Committee, American Express: Organized colleague engagement events. <span style="float: right;"><i>Oct '19 - Present</i></span></li> <li>Planted tree saplings as part of a Tree Plantation Drive by American Express. <span style="float: right;"><i>Aug '19</i></span></li> <li>Volunteered to teach underprivileged kids at an NGO as part of Community TeamWorks(Goldman Sachs). <span style="float: right;"><i>Jun '18</i></span></li> </ul>
